Pradeep Velavali

Senior Power Platform Developer

Hyderabad, India · pradeepvelavali@outlook.com · linkedin.com/in/pradeepvelavali · github.com/pradeepvbh

SUMMARY

Power Platform and AI solutions engineer with 9+ years delivering enterprise-scale automation and business applications. Deep experience across Power Apps, Power Automate, Dataverse and Power BI, supported by a working foundation in Azure data services. Builds production Copilot Studio agents — including on the GitHub Copilot harness — along with API integrations and MCP servers. Owns solutions end to end, from requirements through architecture, build, release and support, working with global stakeholders and mentoring developers.

EXPERIENCE

Senior Power Platform Developer — Epiq Systems

Oct 2023 – Present · Remote, India

- Built **Epiq-KB-MCP**, an MCP retrieval server answering IT helpdesk questions from a knowledge base in Azure Blob Storage, using Azure OpenAI for retrieval and an Azure AI Foundry model for summarisation. In production, integrated within EVA, and designed so other teams can re-point it at their own data sources.
- Built **Casepilots Platform Expert**, a Copilot Studio agent that both answers Power Platform questions and performs setup: provisioning environments, pipelines, service accounts and security groups through authenticated Microsoft Graph calls. Removes 5+ hours of manual setup work each week.
- Built **Compliance Hub**, a model-driven application tracking workforce policy across all 50 US states, with Power Automate and AI prompts performing web scraping and structured summarisation into Dataverse. Saves 15–20 hours and approximately $5,000 per month.
- Built **CALI** end to end as sole developer on the new GitHub Copilot harness — a Learn & Growth agent answering questions sourced from Workday and supporting user training.
- Contributed to **Launchpad**, Epiq's onboarding and offboarding platform processing hundreds of employees daily. Owned all service-related topics, the integrations and their associated flows, and several Exchange-related topics. Platform-level outcomes: around 2,000 hours of manual effort removed monthly and annual savings exceeding $500,000.
- Contributed the Epiq-KB-MCP retrieval layer to **EVA**, Epiq's virtual assistant deployed to Microsoft Teams and M365 Copilot. EVA is a team-built platform; the retrieval layer is the component built by me.
- Developed AI document classification automation processing 50+ documents per run.
- Developed medium-to-complex dataflows and Azure Data Factory pipelines for data migration from varied sources.

Module Lead — Happiest Minds

Sep 2022 – Oct 2023 · Bengaluru, India

- Led a team of three junior developers delivering Power Apps solutions for enterprise clients.
- Owned client onboarding through effort estimation, work breakdown structures, and POC and solution demonstrations.
- Developed a responsive asset management application with offline capability, OCR, multilingual support and print services.
- Optimised SQL queries for bulk data loads, cutting over 90 minutes from upload runs.

Senior Engineer — Quadrant Technologies

Sep 2020 – Sep 2022 · Remote, India

- Designed Q-Migrator, a canvas app for monitoring database migrations, using PCF components, custom connectors and security roles.
- Delivered Power BI enterprise dashboards with row-level security, query parameters, bookmarks and custom hierarchies.

- Developed a timesheet application for Athletico, removing over 50 hours of manual effort each month.

Junior Engineer — Mindtree Ltd

Feb 2017 – Sep 2020 · Hyderabad, India

- Created Power BI dashboards for Microsoft product teams, supporting Office 365 migrations and identity services.
- Developed an outage communication canvas app notifying service and delivery managers in near real time.

TECHNICAL SKILLS

Core — Power Apps · Power Automate · Dataverse · Copilot Studio · Power BI · DAX · Dataflows

Working — Azure Data Factory · Azure Table Storage · Azure Key Vault · Azure Blob Storage · Containers · Lakehouse · Microsoft Fabric

Familiar — SQL · JavaScript · Power Pages

Also — MCP servers · Azure OpenAI · Azure AI Foundry · Microsoft Graph API · GitHub Copilot harness · CI/CD and ALM · Team leadership and mentoring

CERTIFICATIONS

- PL-200 — Microsoft Power Platform Functional Consultant
- PL-100 — Microsoft Power Platform App Maker
- PL-300 / DA-100 — Microsoft Power BI Data Analyst
- MCT, 2021–2022 — Microsoft Certified Trainer (past credential)

EDUCATION

B.Tech — SRIT, JNTU Anantapur · 2012 – 2016
